SOPRO

COMEG

**1977**

SOPRO was founded.

**1986**

Introduction of microcameras for endoscopy.

**2001**

SOPRO joins the Acteon Group.

**2003**

Sopro moves into a bigger, brand new building in La Ciotat.

**2004**

Acquisition of Geyser and development of a range of insufflators and pumps.

**1975**

COMEG was founded.

**1977**

Introduction of medical endoscopes.

**1993**

Introduction of autoclavable endoscopes.

**1994**

Introduction of the urology product line.

**2001**

New optical generation of medical endoscopes.

SOPRO COMEG

**2006**

COMEG joins SOPRO

**2007**

Introduction of a Spine surgery product line

**2009**

Introduction of the SOPRO 397 3CCD Full HD camera

Introduction of the Sopro Medical Software

Introduction of a range of bipolar forceps & scissors

**2010**

Introduction of the Full HD laparoscope

Introduction of HEOS, the hysteroscopic endo operative system

Introduction of UBIPACK, the complete solution for gynecology and ENT

**2011**

Introduction of ULYSS, 4mm autoclavable endoscope with variable direction of view

**2012**

New range of uretero-renoscopes

**2013**

Introduction of a bipolar resectoscopy range

**2014**

Introduction of SYMBIOZ and the SCard

## PRODUCTS RANGE AT A GLANCE

**SOPRO-COMEG offers a complete range ranking from capital equipment to re-usable, high quality, durable instruments. Whatever your application is: Urology, Laparoscopy, Arthroscopy, Gynecology, Spine, ENT, SOPRO-COMEG will offer you the best solution and fulfill your needs.**

**Capital equipment**

SOPRO-COMEG meets the needs of international surgeons and distributors by supplying complete solutions for video endoscopy. Our range includes equipment for both consulting and operating rooms, using latest technologies available in the market. Full HD video cameras, Xenon and LED light sources, insufflators, pumps, shaver, medical grade monitors and visualization/archiving systems. These products have already proven their worldwide reliability and are considered today as a standard in the mini invasive surgery field.

**Laparoscopy**

SOPRO-COMEG proposes a complete range of instruments for entry into the peritoneum, the first and most crucial step in successful laparoscopic surgery. A complete range of hand instruments in both monopolar and bipolar electrocautery versions is also available. The full HD 10mm laparoscope will provide you the quality you need for High Definition picture.

**Urology**

SOPRO-COMEG, a company with over 25 years experience in the urology field, offers endoscopes with exceptional optical quality and a complement of instruments which will ease even the most demanding urological procedures including: cystoscopy, resectoscopy and urethrotomy. These products are an integral part of recent technological advancements which improve the diagnosis-treatment process and the level of care that urologists can now offer to their patients.

**Gynecology**

Gynecology, hysteroscopy, resectoscopy and other procedures are made easier with the SOPRO-COMEG products. Clarity and efficiency are the key words of our gynecology range.

**Arthroscopy**

Sharp images, precision in visualization are possible through the use of our range for arthroscopy from 4.0mm telescopes to the small-joint arthroscopic lines.

**Spine**

Our spinal endoscopy system allows to treat disc-diseases. All types of hernias can be removed in a minimal invasive interlamellar approach, by means of the endoscopic technique. The technique also qualifies for the effective treatment of chronic back-ailments caused by disc-prolaps or tears. Furthermore, endoscopic treatment of spinal stenosis has increased.

**ENT**

Our field of activities also includes all areas of the ENT disciplines, whether it is diagnostics or therapy, practice or clinic. We propose rigid endoscopes and accessories necessary for sinuscopy, otoscopy and laryngoscopy. All our instruments are manufactured with the highest quality materials.

## REGULATORY

**Our business practices and processes are designed to achieve quality results that exceed the expectations of patients, customers, surgeons. We are dedicated to the delivery of quality healthcare products around the world.**

From the start of development of a new device through manufacturing to the final quality control check before delivery, Quality is built in to all our products, as is our commitment and dedication to our customers throughout the world.

Both plants are certified to the highest international quality standard, ISO 13485 for Design, Manufacturing and Sales. Our products comply with the various regulations established across the world, specifically those required by the Food and Drugs Administration and the European Union.

**SOPRO and SOPRO-COMEQ manufactures equipments and endoscopes in accordance with the following directives or standards:**

- Medical device directive 93/42 EEC (M5 2007/47 EEC)
- DIN EN ISO 13485 : 2003 AC:2007 certified : Quality management system
- EN ISO 13485: 2003 AC:2007 certified Quality management system
- EN ISO 13485: 2003 AC:2007 certified Quality management system (issued according to CMDCAS program requirements)
- Series of standards IEC 60601
- Series of standards ISO 8600
- FDA regulations\* (FDA Quality system Regulation 21 CFR Part 820).
- EC attestations issued for all our class II devices..

\*the newest ones may be 510(k) pending.

## RESEARCH & DEVELOPMENT

Innovation being the key to improve health, SOPRO-COMEG invests a significant part of its revenue in R&D and patents filing. Our world-renowned know-how is medical imaging, relying on senior engineers with strong expertise in electronics, software, optics and mechanics.

Also, we in SOPRO-COMEG, have access to the very wide R&D department and connections of our mother company, Acteon group, adding to the previous know-how : ultrasounds, chemical, motors, X-Ray and Cone Beam Computed Tomography systems (CBCT).

This very rare combination of know-how allows us to join the extremely limited group of the companies mastering the design & the manufacturing of the complete endoscopy solution.

## SERVICE & ASSISTANCE

**In both our main plants (La Ciotat and Tuttlingen), our on-site specialists are dedicated to servicing and providing expertises to your SOPRO-COMEg products:**

- Express repair of all our products under warranty
- Free quotation for all repairs out of warranty
- Qualified repair with original spare parts
- Streamline endoscope exchange program)
- Technical training

## SOPRO-COMEG OPTICS

**With more than 30 years as well known manufacturer, SOPRO-COMEG develops its own endoscopes in Tuttlingen (Germany) with the best and latest technology know-how.**

- **Stainless steel tubes:**

Choice of stainless steel tubes is done to ensure optimal quality and solidity by using European quality stainless steels. Our mechanical manufacturing department is making all cutting, polishing, finishing steps to provide you the optimal devices quality and to offer better resistance to disinfection chemical agent.

- **Rod lenses, objective and ocular:**

Since several years, SOPRO-COMEG research and development department does optical calculation to optimized parameters of brightness, contrast and resolution according to the intended use of the endoscope.

Sizes, designs, optical coatings, raw materials, all are precisely chosen by our engineers to achieve the quality you need.

By using the well-known **rod lenses** design and added **multi coating** on each interfaces, the SOPRO-COMEG endoscope offers you the best of the know-how in medical endoscope manufacturers.

During assembly process, the complete optical system is optimized with ocular and objective to achieve the requirements of quality. Our SOPRO-COMEG Full HD laparoscope is able to provide a constant **high resolution** picture full screen in order to complete your Full HD video chain.

• **Light fibers** are selected and calculated to provide maximum light in the operating field. Our internal manufacturing process permits to position the fibers in order to illuminate in the same direction as the direction of view of your endoscope. Endoscope light fibers can easily be connected to many of existing light cable and all our endoscope are delivered with light cable adapters (Karl Storz, Olympus, Richard Wolf, ACMI).

• **Cleaning, disinfection, sterilization and reliability** are ones of the most important requirements of today endoscopes.

Thanks to our **laser welding** technology and our validated manufacturing processes, SOPRO-COMEG offers a constant assembly quality. The use of distal and proximal **sapphire window** avoids many scratches on the optical system and the tightness of the optical system is done with patented process using valuable raw materials. With this high technology, SOPRO-COMEG endoscopes are warranty autoclavable up to 134°C during 20 minutes, double fore-vacuum.

Cleaning disinfection and sterilization processes are validated by external laboratory to ensure the respect of quality requirements. Our SOPRO-COMEG endoscopes can be clean manually or with automatic machines as defined in our user manual. SOPRO-COMEG endoscopes are compatible with the following sterilization methods:

- Steris TM
- Sterrad
- Vapor sterilization
- EtO
- Cidex
- Henkel-Ecolab Sekumatic FRE

# 2 OPTICS

## STREAMLINE EXCHANGE PROGRAM

Efficiency and reactivity are the main goals of our service department.

The **Streamline endoscope exchange program** is the perfect example of these commitments.

Streamline exchange program allows you to exchange your defective autoclavable optics from any brands for a newly manufactured SOPRO-COMEG optics.

All Streamline endoscopes are manufactured in our plant in Tuttlingen, Germany, with original parts to fulfill all specifications, standards and regulatory compliance ISO 13485 as the other SOPRO-COMEG optics. All individual parts are carefully checked by our incoming inspection department before assembly to achieve the quality you need.

**48h:** it's the time we need to send you your Streamline endoscope after receipt of your order.

**Whatever is the autoclavable optics you send to us we provide your needs.**

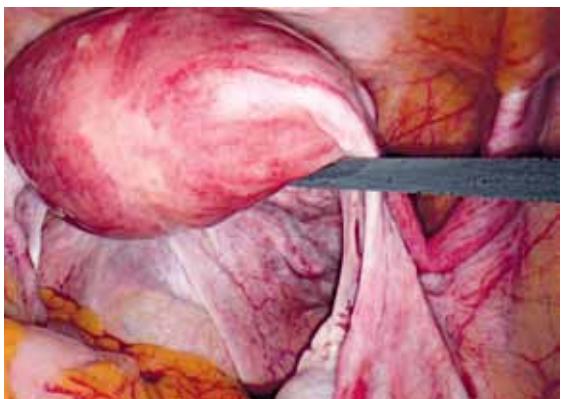

As example, you can send us a broken autoclavable sinuscope from other brand and asking for a SOPRO-COMEG Full HD Streamline 10mm laparoscope.

Nevertheless, the SOPRO-COMEG optics technology permits to proceed, most of the time, to a repair. After expertise of your medical device, our technician will sent you a repair offer according to the repair flat rate.

If the device cannot be repair we will send you an offer for a Streamline product or, if the optics is not eligible to this Streamline exchange program, a very attractive pricing for new endoscope.

## GENERAL INFORMATION

### Direction of view

Direction of view is defined by the angle between the deviation of the middle beam and the axis of the optical system.

### Field of view

Field of view is defined by the angle between the most left and right peripheral beam of the image.  
It is important for the distinction of wide-angle and standard-angle telescopes.

### "WIDE ANGLE" (WA)

"Wide angle" telescopes provide a bigger field of view.

## URETERO-RENOSCOPES, URETEROSCOPES

The SOPRO-COMEG autoclavable uretero-renoscopes are using the best fiber optics technology to provide an excellent resolution. The atraumatic transition from the small to big diameter at the distal end permits a gentle insertion into ostium uteris. The SOPRO-COMEG uretero-renoscopes are available with a stopcock input unit included and a large range of instruments needed to perform uretero-renoscopy in good conditions.

### Features and specifications:

- round shaped distal tip for atraumatic ostium insertion
- distal tip from 6 Fr. to 8.5 Fr.
- instrument channel for use with flexible or rigid instruments up to 5 Fr.
- direction of view 0°, 6° or 12°
- working length 430mm or 315 mm
- Marberger or Bichler angled eyepiece to ensure ergonomics when using instruments or lithotripsy probes.

# 3 CYSTOSCOPY

## QUICK-LOCK AND SC SERIES

SOPRO-COMEG is involved to provide the best medical devices according end user requirements.

Material quality, picture brightness, reliability are some of these needs but our R&D engineers also work to improve the ergonomics of use.

One of the best sample is the Quick-Lock connecting system for sheaths and obturators.

The innovative SOPRO-COMEG Quick-Lock connecting system permits to connect and disconnect endoscope and sheath in an easy and quicker gesture.

While many company are manufacturing rotating screw connection between sheath and optics which needs time and user focusing, SOPRO-COMEG develops an innovative Quick-Lock connecting solution with a simple push. As well, the release of the device together is done simply by a push on the active button.

Physician have also the possibility to use standard connecting system, compatible with other manufacturer's devices, thanks to our SOPRO-COMEG SC series.

## QUICK-LOCK ALBARRAN DEFLECTING MECHANISM

Thanks to one or two working channels, the Albarran deflecting mechanisms allow the use of electro surgery probes as well as of flexible instruments. These devices can be aim towards located area thanks to the deflecting mechanism.

Art.-No.	Description
<b>196 010 010</b>	<b>Albarran deflector mechanism with one working channel</b> to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheaths (see page 23) working channel for instrument up to 9Fr. (see chart page 29)

Art.-No.	Description
<b>196 010 020</b>	<b>Albarran deflector mechanism with two working channels</b> to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheaths (see page 23) working channel for instrument up to 9Fr. (see chart page 29)

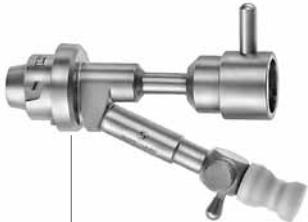

# 3 CYSTOSCOPY

## QUICK LOCK ADAPTER BRIDGES

The function of adapter bridges is to adapt the total length of cystoscopy sheath to telescope length. Thanks to additional working channel, it allows the use of electro surgery probes and flexible instruments.

Art.-No.	Description
<b>196 050 100</b>	<b>Quick-Lock adapter bridge for diagnostic</b> to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheaths (see page 23)

Art.-No.	Description
<b>196 050 200</b>	<b>Quick-Lock adapter bridge with one working channel</b> to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheaths (see page 23) working channel for instrument up to 9Fr. (see chart page 29)

Art.-No.	Description
<b>196 050 300</b>	<b>Quick-Lock adapter bridge with two working channels</b> to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheaths (see page 23) working channel for instrument up to 9Fr. (see chart page 29)

# 3 CYSTOSCOPY

## QUICK-LOCK OPTICAL INSTRUMENTATION

The following optical instrumentation are used directly with Quick-Lock cystoscopy sheath or can be used with Quick-Lock resectoscopy sheath thanks to the adapter ref. 195 091 600.

This instrumentation are used with following 4mm telescopes exclusively:

- 165 403 000 : 4mm straight forward telescope 0°
- 165 403 001 : 4mm telescope 12°
- 165 403 002 : 4mm forward oblique telescope 30°

A minimum of 19,5 Fr. Quick-Lock cystoscopy sheath is required.

Art.-No.	Description
<b>395 400 035</b>	<b>Quick-Lock optical grasping forceps</b> Double action jaws for stent removal to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheath from 19,5 Fr. (see page 23) or with Quick-Lock resectoscopy sheath and adapter ref. 195 091 600 (see page 35)

Art.-No.	Description
<b>395 400 007</b>	<b>Quick-Lock short jaw optical biopsy forceps</b> Double action jaws, forceps located at the bottom of endoscope channel. to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheath from 19,5 Fr. (see page 23) or with Quick-Lock resectoscopy sheath and adapter ref. 195 091 600 (see page 35)

Art.-No.	Description
<b>395 400 030</b>	<b>Quick-Lock optical biopsy forceps</b> Double action jaws, spherical through cutting jaws. to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheath from 19,5 Fr. (see page 23) or with Quick-Lock resectoscopy sheath and adapter ref. 195 091 600 (see page 35)

# 3 CYSTOSCOPY

Art.-No.	Description
<b>395 400 008</b>	<b>Quick-Lock optical scissors</b> Double action jaws, to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheath from 19,5 Fr. (see page 23) or with Quick-Lock resectoscopy sheath and adapter ref. 195 091 600 (see below)

Art.-No.	Description
<b>395 400 006</b>	<b>Quick-Lock optical stone crushing forceps</b> Double action jaws, to use with 4mm telescope (see page 17) to use with Quick-Lock cystoscopy sheath from 23 Fr. (see page 23) or with Quick-Lock resectoscopy sheath and adapter ref. 195 091 600 (see below)

Art.-No.	Description

# 3 CYSTOSCOPY

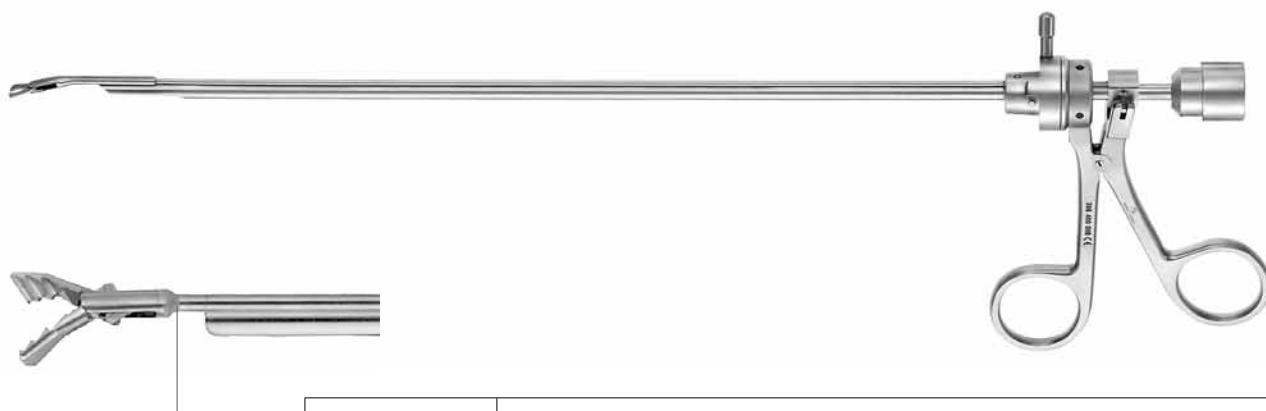

## SC SERIES OPTICAL INSTRUMENTATION

The following optical instrumentation are used directly with SC series cystoscopy sheaths or can be used with SC series resectoscopy sheaths thanks to the adapter ref. 198 091 600 or 198 091 700

This instrumentation are used with following 4mm telescopes exclusively:

- 165 403 000 : 4mm straight forward telescope 0°
- 165 403 001 : 4mm telescope 12°
- 165 403 002 : 4mm forward oblique telescope 30°

A minimum SC series cystoscopy sheath of 20 Fr. is required.

Art.-No.	Description
<b>395 400 035</b>	<b>SC series optical grasping forceps</b> Double action jaws for stent removal to use with 4mm telescope (see page 17) to use with SC series cystoscopy sheath from 20 Fr. (see page 26) or with SC series resectoscopy sheath and adapter ref. 198 091 600 or ref. 198 091 700 (see page 37)

Art.-No.	Description
<b>398 400 031</b>	<b>SC series short jaw optical biopsy forceps</b> Double action jaws, forceps located at the bottom of endoscope channel to use with 4mm telescope (see page 17) to use with SC series cystoscopy sheath from 20 Fr. (see page 26) or with SC series resectoscopy sheath and adapter ref. 198 091 600 or ref. 198 091 700 (see page 37)

Art.-No.	Description
<b>398 400 030</b>	<b>SC series optical biopsy forceps</b> Double action jaws, spherical through cutting jaws to use with 4mm telescope (see page 17) to use with SC series cystoscopy sheath from 20 Fr. (see page 26) or with SC series resectoscopy sheath and adapter ref. 198 091 600 or ref. 198 091 700 (see page 37)

# 3 CYSTOSCOPY

## QUICK-LOCK CONTINUOUS FLOW LASER CYSTOSCOPY

In addition to our 4mm forward oblique telescope 30°, the SOPRO-COMEG continuous flow cystoscopy system allows the use of laser fibers in urethra, bladder or prostate.

The continuous flow insures a perfect control under endoscopic view and the SOPRO-COMEG Quick-Lock connecting system permits an easier and quicker use of this innovative device.

With its totallyatraumatic distal tip and it's 7Fr. operating channel, the 23Fr. laser cystoscopy system is the device you need for urology laser procedures.

The large operating channel allows the use of catheter and flexible instruments (see page 43) and mainly all laser fibers.  
Continuous flow sheath and visual obturator are also available to adapt the device to your choices.

Art.-No.	Description
<b>196 080 400</b>	<b>Continuous flow laser cystoscopy sheath, complete</b> to use with 4mm forward oblique telescope 30°, ref. 165 403 002 with 7Fr. working channel delivered without obturator.

Art.-No.	Description
<b>196 080 000</b>	<b>Quick-Lock inner sheath for continuous flow laser cystoscopy</b> to use with 4mm forward oblique telescope 30°, ref. 165 403 002 to use with Quick-Lock outer sheath ref. 196 080 400 with 7Fr. working channel delivered without obturator.

Art.-No.	Description
<b>196 080 100</b>	<b>23 Fr. Quick-Lock outer sheath for continuous flow laser cystoscopy</b> to use with Quick-Lock inner sheath ref. 196 080 000

Art.-No.	Description
<b>196 080 300</b>	<b>Quick-Lock visual obturator for continuous flow laser cystoscopy system</b> to use with inner sheath ref. 196 080 000 or with combi sheath ref. 196 080 400

# 3 CYSTOSCOPY

## FLEXIBLE INSTRUMENTATION

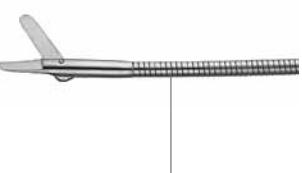

Specially designed for intensive use, the SOPRO-COMEG flexible instrumentation is the perfect tool to perform operating cystoscopy. Available in different sizes from 5 Fr. to 9 Fr. these flexible instruments are adapted to be used with Albarran deflecting mechanism or cystoscopy adapter bridges with operating channels.

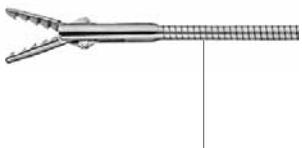

Art.-No.	Description
<b>395 400 020</b>	<b>5 Fr. flexible forceps for removal of foreign body</b> double action jaws, autoclavable, 40 cm working length
<b>395 400 000</b>	<b>7 Fr. flexible forceps for removal of foreign body</b> double action jaws, autoclavable, 40 cm working length

# 4 RESECTOSCOPY

Since more than 25 years, SOPRO-COMEG is involved in developing transurethral resection (TUR) devices, the standard for resection of bladder tumors and prostatic hyperplasia.

The SOPRO-COMEG resection devices allow to proceed TUR in safety conditions and with exceptional optical quality. Nevertheless, SOPRO-COMEG also developed a laser resection device for physicians who are familiar with this procedure.

The innovative SOPRO-COMEG Quick-Lock connecting system permits to connect and disconnect endoscope and sheath in an easy and quicker gesture.

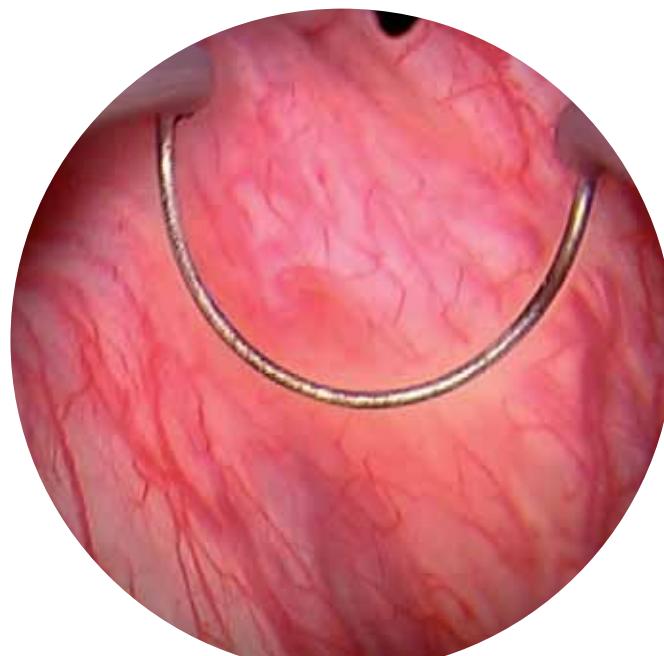

However, physician have also the possibility to use a standard connection, thanks to our SOPRO-COMEG SC series.

Passive or active, the SOPRO-COMEG working element, as well electrodes and sheaths, are made with the same quality in term of raw material, choice of stainless steel and human know-how.

## Passive or active?

**ACTIVE** Active working element activate the electrode movement when physician is closing the handle.

**PASSIVE** Passive working element active the electrode movement when physician release the handle.

# URETERO-RENOSCOPY

## URETERO-RENOSCOPES, URETEROSCOPES

The SOPRO-COMEG autoclavable uretero-renoscopes are using the best fiber optics technology to provide an excellent resolution. The atraumatic transition from the small to big diameter at the distal end permits a gentle insertion into ostium uteris. The SOPRO-COMEG uretero-renoscopes are available with a stopcock input unit included and a large range of instruments needed to perform uretero-renoscopy in good conditions.

**Features and specifications:**

- round shaped distal tip for atraumatic ostium insertion
- distal tip from 6 Fr. to 8.5 Fr.
- instrument channel for use with flexible or rigid instruments up to 5 Fr.
- direction of view 0°, 6° or 12°
- working length 430mm or 315 mm
- Marberger or Bichler angled eyepiece to ensure ergonomics when using instruments or lithotripsy probes.

**6 Fr. / 7.5 Fr.**

Art.-No.	Description
<b>186 514 001</b> <b>NEW</b>	<b>Uretero-renoscope 6 Fr., autoclavable</b> 30.000 pixels resolution, Marberger style working length 430 mm instrument channel 1 x 4 Fr. viewing direction 12° Color code: ■

# 10 NEPHROSCOPY

## PERCUTANEOUS NEPHROSCOPES

Art.-No.	Description
<b>195 800 050</b>	<b>27Fr. Nephroscopy standard obturator, Quick-Lock</b> with 3Fr. Working channel to use with 27Fr. Quick-Lock nephroscopy sheath Color code: ■

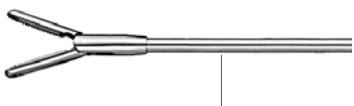

Art.-No.	Description
<b>195 800 040</b>	<b>Laserguide</b>

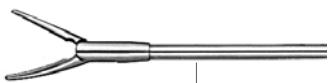

Art.-No.	Description
<b>195 800 050</b>	<b>Dilation set</b> 8 tubes from 9 to 30 Fr 2 flexibles and 2 rigid quidewires

# 10 NEPHROSCOPY

## RIGID INSTRUMENTATION

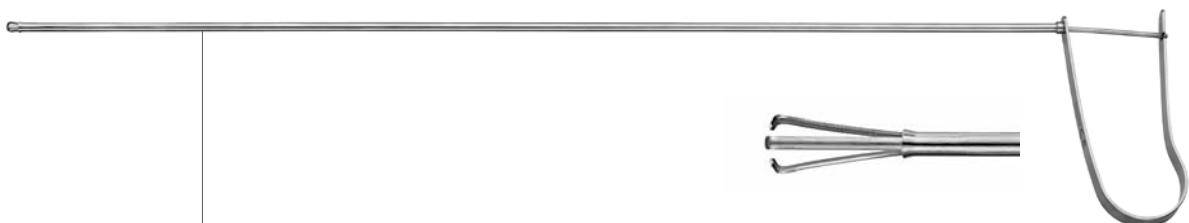

Art.-No.	Description
<b>395 700 000</b>	<b>9 Fr. Rigid grasping forceps for removal of stone fragments</b> double action jaws, fenestrated, autoclavable irrigation port in tube metal handle 30 cm working length

Art.-No.	Description
<b>395 700 010</b>	<b>9 Fr. Rigid grasping forceps for removal of stone fragments</b> double action jaws, slim and curved autoclavable irrigation port in tube metal handle 30 cm working length

Art.-No.	Description
<b>395 700 020</b>	<b>9 Fr. Rigid micro scissors</b> single action jaws, straight autoclavable cut 3.5mm, metal handle 30 cm working length

Art.-No.	Description
<b>395 700 030</b>	<b>9 Fr. Triradiate grasper for large stone fragments</b> Jaws with fixation spikes, straight U-spring handle, autoclavable 30 cm working length

## 11 MAINTENANCE, CLEANING AND STERILIZATION

General information . . . . .	p136
Handling instructions for telescopes . . . . .	p137
Sterilization baskets . . . . .	p138

# STERILIZATION AND MAINTENANCE

## GENERAL INFORMATION

All our products are delivered with a IFU (Instruction for Use) where you will find all proper advices as far as maintenance, cleaning and sterilization are concerned.

# STERILIZATION AND MAINTENANCE

## HANDLING INSTRUCTIONS FOR TELESCOPES

The telescopes are intended to be used according to the general instructions and only by instructed or trained medical personnel.

Service and maintenance may just be performed by authorized service personnel.

Prior and after each use on the telescopes a visual and functional inspection for completeness, optical quality, rough surfaces, sharp edges and prominent parts has to be performed. Immediately after each use the telescopes have to be cleaned and disinfected.

Special care has to be taken to scopes with working channel. It must be ensured that the solution for disinfection reaches all areas within the narrow working channel.

For the adjacent sterilization process the telescopes must be free of contaminations and residues of the agent.

In order to be compatible to other products and to allow combinations please make sure that the intended use and technical parameters (working length, diameter, connection type, etc.) match and do not adversely affect the performance and the safety requirements.

Please refer to applicable instruction manuals.

As with any optical device, SOPRO-COMEG telescopes are fragile and should be handled with care. In order to avoid damage or loss of quality the following instructions concerning handling, storing and transportation have to be followed:

- Always hold the endoscope by its eyepiece or body part!
- If possible, store the endoscopes individually!
- Avoid contact between the glass parts and other instruments or surfaces!
- The telescopes may under no circumstances be exposed to Gamma radiation! The image quality can be adversely affected!
- Do not drop the endoscope and do not bend the tube, or otherwise add mechanical stress!

### **Conditions of use, storage and transport:**

Use: +10° C to +134° C, 30% to 100 % rel. humidity, pressure 700 hP to 2000 hP  
 Storage/ Transport: -20° C to +60° C, 10% to 90 % rel. humidity, pressure 700 hP to 1060 hP

### **Safety information:**

Check and sterilize instrument prior to any use. In case of any doubt return instrument to manufacturer for investigation and safety check. Disposal of product please refer to the specific regulations of your country.

Handling: In case you do not have the current version of the Handling and Instruction Guide we would be pleased to send a copy upon request.

Combinations: A requirement for common use with other products is the correspondence in intended use and the technical specifications (working length, diameter, etc.). Further information you will find in our product catalogues.

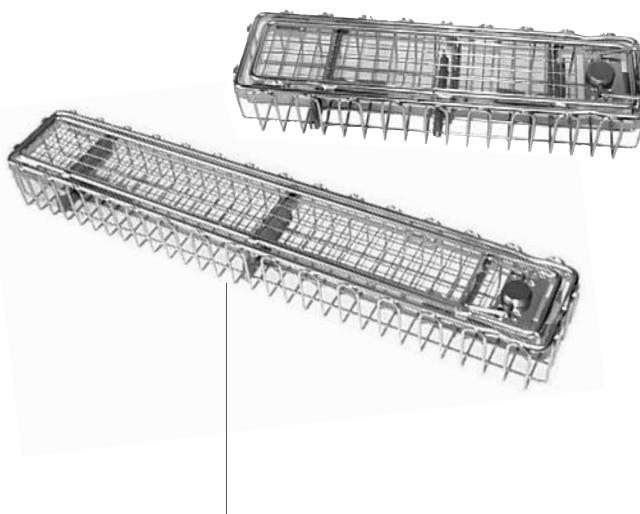

Warranty: For the warranty time please look at our general trade conditions. Excluded from warranty are misuse, incorrectly cleaning, maintenance and repair, normal wear and tear and defects, known at the time of cession.

Prior to each use and/or returning to the manufacturer the products have to be cleaned and sterilized according to this maintenance instructions.

## STERILIZATION AND MAINTENANCE

## STERILIZATION BASKETS

Include a cover and a silicone endoscope holder for easier handling during treatment (cleaning, sterilization, etc.) maximum protection against damages suitable for steam, gas and plasma sterilization.

Art.-No.	Description
<b>390 400 100</b>	<b>Sterilization basket</b> With silicone holder Size 290 x 80 x 52mm
<b>390 400 110</b>	<b>Sterilization basket</b> With silicone holder Size 460 x 80 x 52mm
<b>390 400 130</b>	<b>Sterilization basket</b> With silicone holder Size 458 x 166 x 82mm
<b>390 400 150</b>	<b>Sterilization basket</b> With silicone holder Size 640 x 150 x 77mm

Art.-No.	Description
<b>191 402 061</b>	<b>Plastic sterilization tube for endoscope</b> For steam sterilization Box of 10 units

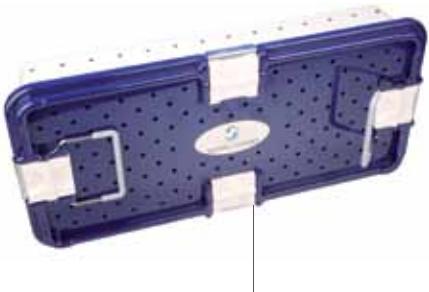

Art.-No.	Description
<b>195 101 000</b>	<b>Sterilization tube for electrodes</b> For steam sterilization

# STERILIZATION AND MAINTENANCE

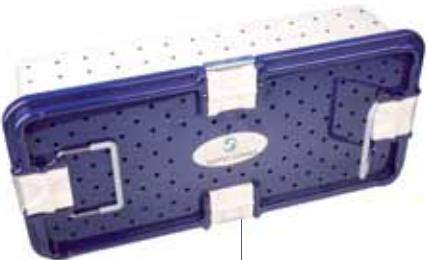

## STERILIZATION BASKETS

Art.-No.	Description
<b>390 400 160</b>	<b>Plastic sterilization box</b> For steam sterilization Delivered with a silicone mat Size 530 x 255 x 67mm

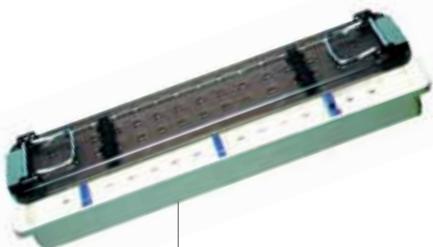

Art.-No.	Description
<b>390 400 170</b>	<b>Plastic sterilization box</b> For steam sterilization Delivered with a silicone mat and an internal tray Size 530 x 255 x 110mm
<b>391 309 000</b>	<b>Plastic sterilization box for the bipolar resectoscope</b> For steam sterilization Delivered with a silicone mat Size 530 x 255 x 115mm

Art.-No.	Description
<b>390 400 180</b>	<b>Plastic sterilization box</b> For steam sterilization Delivered with a silicone mat and two internal trays Size 530 x 255 x 140mm

## PLASTIC STERILIZATION BOXES

Art.-No.	Description
<b>390 400 190</b>	<b>Plastic sterilization box</b> for two telescopes Size 394 x 70 x 35mm
<b>390 400 200</b>	<b>Plastic sterilization box</b> for two telescopes Size 457 x 70 x 35mm
